# Collaborative Accounting Solutions

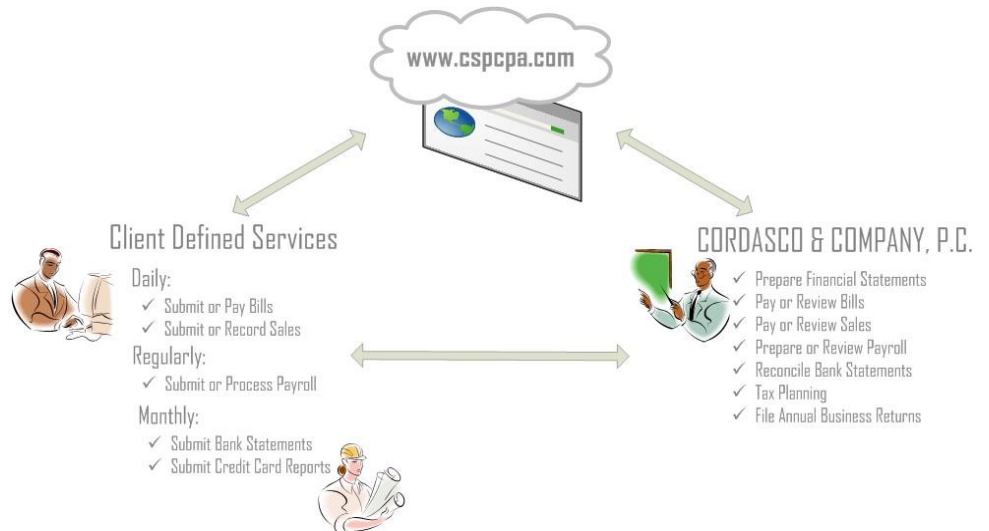

No matter your company size or industry, we have customizable outsourcing solutions to suit the particular needs of your organization. We start with a secure online environment that provides 24/7 access to financial data via a technologically advanced SaaS-based platform, so communications and document exchange is in real-time. We work with you to customize the service bundle to a perfect fit, so you pay only for what you need. For easy budgeting and consistent billing, we offer fixed fee agreements with monthly invoicing. Any of the following broad solutions can be tailored to your organization:

■ **Financial Statements:** Simply go to our secure website to pay your bills and record your deposits. We take it from there. Our professionals reconcile your bank and credit card statements, issue financial statements, prepare tax returns and provide tax planning. All in our collaborative real-time, secure environment.

■ **Transaction Support:** A more comprehensive solution, this customized service can be bundled to include issuing invoices, processing accounts payable, cutting checks, payroll and more. We customize the specific services that you need, so that you can control the specific services that we provide and manage your cost. This solution is designed to provide you with operational relief and provide substantial savings on the cost of your internal staff. We provide you with the necessary accounting expertise and 24/7 access to your financial data in our collaborative real-time, secure environment.

■ **Full Outsourcing:** Our all-inclusive small business accounting solution is designed to provide the benefits of a full scope internal accounting and finance department for less than the cost of a full-time bookkeeper. We handle all aspects of your day-to-day accounting functions while providing you with 24/7 access to your financial data in our collaborative real-time, secure environment. We provide the accounting expertise, the systems and training, so that you can focus on what's important—"your business".

■ **Tax Planning & Preparation:** We have an extensive tax practice. This is one of the biggest benefits that we provide to our clients. We provide extensive and comprehensive tax planning to insure that you minimize your overall tax liability. We continually strive to provide you with ideas and strategies to take full advantage of the current law. We also prepare all the necessary business tax returns while providing you with easy access to this information for your review with electronic storage through our secure platform.
